

Gamma Microsoft Teams Phone

Microsoft Teams Phone is the ultimate step in creating a truly modern working environment, It provides a secure, productive employee experience with calls, chat, meetings, and Microsoft 365 apps united in one easy-to-use tool.

Gamma are experts in enabling voice for Microsoft Teams - choose from Operator Connect or Direct Routing (managed or unmanaged). Our proven expertise and accreditation as well as impeccable customer service means we are perfectly placed to make the transition as seamless as possible for your customers.

Market need

Microsoft Teams Phone addresses the market need for a UC platform that combines voice calling, messaging, and collaboration all in one place. This means businesses no longer have to manage multiple communication tools and services, which can reduce complexity and costs. It also supports the growing trend towards remote work and flexible working arrangements. With Teams Phone, employees can make and receive calls from anywhere, using any device. This means they can work from home, on the road, or in the office, all while maintaining a consistent communication experience. Cavell predict Microsoft Teams will have 33% UC market share for the UK by 2026.
